

The Redwood Emergency Communications Network (RECoN)
Sunday Evening MAIN Net Preamble

REPEATER

Good evening this is <*first name and call sign*>, net control, calling the Redwood Emergency Communications Net, calling the RECoN Net. The purpose of this net is to develop and maintain a state of readiness to provide auxiliary communications in the event of an emergency. Since this is a directed net, please transmit as requested by the net control station. All licensed amateurs are invited to check in to this net. New or visiting stations will be checked in after Unit Comm Leader roll call. All RECoN members will be checked in on one of the local simplex nets that follow this net.

This net meets weekly on Sunday at 9:00 PM on the 145.35 MHz repeater, with a PL of 88.5Hz, except on the first Sunday of the month where we meet on 147.51 MHz simplex.

Emergency traffic always has priority on the net. If there is any emergency traffic, please use the phrase “emergency traffic” on your first key-up.

Are there any announcements for the net, come now?

(Pause for any traffic, then continue when all traffic is finished.)

We will now conduct the Unit Comm Leader roll call. *(Do not say the following on the 2nd Sunday)* Please be ready to report your count from last week’s net.

(Perform Unit Comm Leader roll call.)

This concludes the Unit Comm Leader roll call. Are there any visiting stations or RECoN members who are unable to check in with their local simplex nets who would like to check in at this time? Come Now.

(Pause for any additional check-ins,)

Is there any other traffic before we close the net? *(Pause for any last traffic.)*

This concludes the RECoN net for this evening. We wish to thank the trustees of this repeater for letting us use it for the net. All RECoN members should now go to their simplex nets where local roll calls will be taken. This is *(give first name and call sign)*, closing the net at *(give time)*. 73’s *(pronounced “seven threes”)*. I’m clear.
